Election/Restrictions

1. Applicant's election of Species B in the reply filed on July 1, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 6, 9 and 10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 1, 2005.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5, 7, 8 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malosh et al. in view of Yasuda et al.

Malosh et al. teach a refrigerator comprising a refrigerator housing (32), a compressor (34) mounted to the housing. However, Malosh et al. do not teach a spring configuration mounting the compressor to the housing. Yasuda et al. teach a damped spring configuration capable of mounting a compressor to a housing and connecting at least one connecting point of the compressor to a connecting point of the refrigerator housing, the spring configuration having at least one individual spring element (14) and

at least one additional oscillation-enabled element (13 or 15) configured to oscillate at a different resonant frequency than said individual spring element. It would have been obvious to one of ordinary skill in the art to have provided the spring configuration of Yasuda et al. in the refrigerator of Malosh in order to reduce vibrations.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schubert et al. and Olgac teach damped spring configurations.
